

Web Recon Helper Tools — WhatWeb / CeWL / theHarvester / WHOIS

Small helper tools for fingerprinting, wordlists, OSINT, WHOIS, and quick DNS checks without needing a full standalone guide for each.

» Abdullah Nasser Almsan — Personal Pentest Reference

Usage note: This is intentionally a grouped helper reference. Tools with larger workflows, such as ffuf and WPScan, have their own guides.

WORDS

CeWL

FOLLOW-UP

ffuf / WPScan

Contents

1. WhatWeb
2. CeWL
3. theHarvester / WHOIS
4. DNS quick helpers
5. Web Recon workflow

1. WhatWeb

Fast fingerprinting for visible web technologies.

KALI TERMINAL — Basic

```
whatweb http://[TARGET]/
```

KALI TERMINAL — Verbose

```
whatweb -v http://[TARGET]/
```

A fingerprint is not absolute proof of a version. Confirm it from headers, files, or application behavior.

2. CeWL

Build a wordlist from content on an authorized site.

KALI TERMINAL — Basic

```
cewl http://[TARGET]/ -w cewl.txt
```

KALI TERMINAL — Depth / minimum length

```
cewl http://[TARGET]/ -d 2 -m 5 -w cewl.txt
```

Note: Use generated wordlists only in the lab context that authorized collecting/testing them.

3. theHarvester / WHOIS

Useful for initial OSINT when the scope permits public reconnaissance.

KALI TERMINAL — theHarvester help

```
theHarvester -h
```

KALI TERMINAL — Domain query example

```
theHarvester -d [DOMAIN] -b [SOURCE]
```

KALI TERMINAL — WHOIS

```
whois [DOMAIN]  
whois [IP]
```

4. DNS quick helpers

The project has a full DNS cheat sheet; these commands are only the quick entry point.

KALI TERMINAL — Records

```
dig [DOMAIN] A  
dig [DOMAIN] MX  
dig [DOMAIN] NS  
dig -x [IP]
```

KALI TERMINAL — host / nslookup

```
host [DOMAIN]  
nslookup [DOMAIN]
```

For zone-transfer and deeper subdomain workflows, use the existing [DNS_Cheatsheet.html](#).

5. Web Recon workflow

Step	Tool	Goal
1	whois / dig	Domain and DNS context.
2	whatweb	Technology clues.
3	curl / Burp	Headers and endpoints.
4	Gobuster / ffuf	Content discovery.
5	WPScan	If WordPress is confirmed.
6	SearchSploit	Only when a documented product/version is available.

Prepared as a quick-reference companion to the canonical Arabic guide. Use only in labs or systems you are explicitly authorized to test.
